

6.AM

THE NEXT GENERATION OF MURANO GLASS DESIGN

6:AM Glassworks is an emerging high-end design brand based in Milan, Italy, founded in 2018 by the creative duo Edoardo Pandolfo and Francesco Palù. With Edoardo's connection to the glassmakers in Murano and Francesco's architectural expertise, the brand blends the traditional artisanal approach with contemporary design techniques, resulting in unique and transversal artistic glass creations. From large-scale installations to sculptural objects, 6:AM Glassworks prides itself on innovation in the design process and the highest quality craftsmanship. The company also offers production services to other artists, designers and businesses, allowing them to bring their own projects to life. With a passion for creativity and a commitment to excellence, 6:AM Glassworks' objective is to make a lasting impact in the world of high-end design and artisanal glassmaking.

LINA

All of the glass tiles in the Paysage and LINA collections are available in eight standard colors - from top left to bottom right: (1) Bluino, (2) Petrolio, (3) Cristallo, (4) Rosa, (5) Fumé, (6) Opalino, (7) Acciaio, and (8) Ambra - that can be customized to the client's desire. This versatility allows our clients to create truly unique lighting installations that perfectly match their personal aesthetic and style.

SISTEMA

6:AM Glassworks and NM3 collaborate to create 'Sistema' lighting collection inspired by the grooved glass designed by Angiolo Mazzoni and Carlo Scarpa in the 1930s, which was used to illuminate large surfaces in public and representative spaces. An example is the Florence railway station 'Santa Maria Novella'. The unique design of the glass has been reinterpreted to create a collection of lamps that pay homage to the Italian design tradition.

ALTA TTTO

6:AM presents the first glassware collection conceived in collaboration with the Altatto bistro. The set designed is composed of a tall and narrow water glass that is inspired by oriental tea glasses, a lower and wider cocktail glass, and a cylindrical jug. This colour is made of "canne vitree", solid sticks that are traditionally used in murano's artistic glass, wisely used by the glass master.

SCULPTURES

1-1-1

SCULPTURES

1-1-1, a sculpture series where Murano glass and Carrara marble meet together. Random molds with recycled material found around the hot shop, allow the glass to take unpredictable shapes, while a soft imperfect texture is given by the marble powder retrieved from the caves.
